About My Horses My Healers

The mission of **My Horses My Healers Sanctuary** is to create a healing space for humans, horses and other animals, to provide educational and therapy programs supporting human and animal collaboration. This is a **Non-Profit** organization offering training programs for people who want to learn to partner with horses through the practices of yoga, art, sand play therapy, and riding excursions to facilitate healing.

Shelley Rosenberg, founder of My Horses My Healers, has been riding since the age of nine. She found sanctuary at the stables with horses and safety there from her abusive childhood. She tells this story in her first book, [My Horses My Healers](#).

Shelley believes horses can be healers for anyone. Work begins on the ground with the horse. As herd animals they help us to understand the connection with ourselves, our emotions, how we interact within our personal relationships and in society. There is no need to be a horse lover or rider to benefit from the healing power of horses.

Key Note Speaker is [Amberley Snyder](#) the inspiration for the docu-drama **Walk.Ride.Rodeo.**
